

Natural Gas Patio & Pool Heaters

Clean - Efficient - Reliable. Gas. It's a Natural.™

THE NATURAL GAS ADVANTAGE

Living in the South, we already enjoy a long outdoor season. You can enhance your outdoor leisure time and enjoy your patio and swimming pool more months out of the year with economical, convenient and dependable natural gas heaters.

There are a variety of models and sizes available depending upon the size of the patio, pool or spa you are trying to heat.

Infrared Patio Heaters

- Can be used in totally exposed outdoor areas
- Are available in portable, freestanding, hanging, wall-mounted permanently installed upright and tabletop models
- Come with instant spark or electric ignition
- Radiate heat up to a 20-foot circular area
- Come in mushroom- or umbrella-shaped units
- Are available with 100 percent safety shutoff control valve
- Can warm as large an area as needed by using multiple heaters
- Are most effective when the outdoor temperature is between 50 and 70 degrees

Swimming Pool Heaters

- Are available to heat any size pool
- Have accurate controls that keep water within 10 degrees of the set temperature
- Come in a wide variety of styles including gas-fired storage, instantaneous, circulating and immersion systems
- Maintain water temperatures at a consistent and comfortable level
- Cost 2.5 times less to operate than an electrical resistance pool heater
- Warm your spa or hot tub to the desired water temperature in minutes instead of hours
- An unheated pool will generally stay at about the average outdoor temperature. Using a natural gas pool heater, you can enjoy more comfortable pool water temperatures -- 78 to 82 degrees F in spring and fall and 76 to 78 degrees F in winter. Normal spa or hot tub temperatures can average at or above 100 degrees F.
